

THE LONDON HIPPODROME CASINO

The Hippodrome has opened to great acclaim.

Cadmium have been the Architects and Designers for the 90,000sq ft venue which includes 5 bars, a signature restaurant, a fabulous performance space plus three floors of gaming and a breath defying poker deck high up in the gods.

Features that we have created include the 'Dandelion Lights', the 'Penny Floor', the 'Crystal Rain' lights, the jewel like focal point of a bar set in the centre of the beautifully restored auditorium.

TOP GOLF

Cadmium have taken a fresh approach to the design of the TopGolf venues in order to widen their appeal and make their bars and restaurants a destination in their own right.

Creating the right atmosphere in the venues was the main challenge. The proposals include a new central bar with a 'light catcher' feature that reflects and sparkles the array of coloured lighting effects, like sunshine on the swinging shaft of a golf club.

A giant media wall, private party areas and feature toilets are amongst the other design features.

GROSVENOR CASINO - GEORGE STREET

Set in the heart of Manchester's China Town, the refurbishment has added a new level of luxury and quality to this existing casino.

Bold wallpapers, beautiful lights, and bespoke artwork have infused the space with an inviting but striking effect. The ground floor feels twice the size with the careful use of printed mirrors.

The new bar and dining lounge area on the lower level provide a dramatic yet welcoming and intimate space to break away from the gaming.

THE ROYAL MARSDEN - ELLIS WARD

What a difference artwork can make to an environment.

This brave approach to hospital design has been welcomed by both staff and patients. The aim of the design is to make all visitors feel special and welcomed in what could otherwise be a difficult time.

We have created a beautiful array of kaleidoscopic artwork based around the Anemone flower and have softened the spaces with gentle curves and petal like floor features.
